

jump math™  
MULTIPLYING POTENTIAL.

## 2021 ANNUAL REPORT

**JUMP Math** is pleased to present its FY2021 annual report. During this period, our program reached almost 250,000 students globally, including 14,900 students learning in remote Indigenous communities.

We are an award-winning registered charity founded by **Dr. John Mighton** in 2002 with the vision of creating an equitable and numerate society for all through mathematics education.

*“We support JUMP Math because we believe that math proficiency can be a great equalizer.”*

Rebecca Scovel, Director, M.E.H. Foundation

We believe that everyone can be great at mathematics.

We empower educators and students with research-informed, curriculum-aligned resources and approaches that instill confidence and spark a life-long love of mathematics.

We collaborate with those advancing education around the world to foster human potential and well-being.

JUMP Math’s **resources (Grades K-8)** are used in elementary schools and homes across Canada and the US, as well as several other countries including Spain, Chile, Colombia, and Bulgaria.

## PANDEMIC RESPONSE

With lengthy school closures due to COVID-19, JUMP Math quickly pivoted to support teachers, students, and families. Through different projects, we:

- Provided **free digital math resources and training** webinars for teachers.
- Helped kids bridge math learning gaps with **new online activities** for families, with funding from the Laidlaw Foundation.
- Piloted a new approach to **after-school math tutoring** at 18 high-priority schools across Toronto (in partnership with the Toronto Foundation for Student Success’ Beyond 3:30 program) and reached 800 at-risk students.

## 2021 ACHIEVEMENTS

- Named a **Top 10 Impact Charity** by **Charity Intelligence Canada** for the twelfth time, and also a **Top 5 Impact: Canadian Youth Charity**.
- Awarded \$500,000 from the Ontario Government to create new **online Financial Literacy resources** in French and English for Grade 4–9 teachers and students.
- Supported 4,152 students with **free resources** through the 2021 National Book Fund, funded by TD Bank Group.
- Developed and launched a **new, fully-accessible website**, featuring an **online store**, free Resource Centre and blog, with the support of volunteers from IBM’s Service Corps.

*“We strongly believe that JUMP Math’s evidence-based approach provides practical, accessible, and community-focused solutions to addressing long-standing challenges and barriers facing students at the margins of the education system. This is especially true for students who are further disadvantaged by disruptions the pandemic has caused...”*

Jehad Aliweiwi, Executive Director,  
Laidlaw Foundation

Since 2002, JUMP Math has reached over **1.5 million students worldwide.**

*“JUMP Math has been the best math resource I have implemented in my 25+ years of teaching experience.”* Grade 5 Teacher, Alberta

## GLOBAL REACH IN 2021

**9,700** ELEMENTARY TEACHERS REACHED

**248,000** STUDENTS REACHED THROUGH RESOURCES & CHARITABLE PROGRAMS

**14,900** STUDENTS LEARNING IN REMOTE INDIGENOUS COMMUNITIES

In 2021, JUMP Math was recognized by Charity Intelligence Canada as:

*“JUMP Math really is a great program. My boys are off at university now, but I used it to supplement their in-school learning. I am not strong in math... so found JUMP Math and we used it all the way up.”*

JUMP Math Parent
