Founded in 2001, JUMP Math is a charitable organization that produces evidence-based classroom math programs. Our mission is to help all children achieve their full potential by encouraging a deep understanding and a love of math in students and educators, as well as to use math as a means to build the social and emotional skills required for long term academic and life success. Third party research including standardized controlled studies validate the efficacy of the JUMP Math approach. By demonstrating that all students can achieve academic success, we seek to change the way society thinks about our childrens’ potential.

**HOW IT WORKS**

- The approach is a balance of structured inquiry and explicit instruction
- Skill review is embedded and new concepts are introduced gradually
- Provides structured, curriculum-aligned lessons and assessment tools
- Fosters confidence and success for both students and teachers
- Improves the personal, social and economic outcomes of children

“JUMP Math makes me a more confident teacher and the students feed off my excitement.”

(JUMP Math Book Fund Teacher)

**RESULTS**

- **5,000** students awarded resources
- **4,200** teachers trained
- **215,000** students reached globally

**IMPACT**

JUMP Math students grew in math achievement at 2.8 times the rate of the WRAT-4 standardization sample.*

*From 2017-18 National Book Fund pre & post assessment of 240 students

“Students' confidence and abilities improved throughout the year. Students' who broke down in tears during math class were smiling. Some students were even writing and drawing about their math class in other subject areas.”

(JUMP Math Book Fund Teacher, 2017-2018)
